

Virtual Math Professional Development

Focus and Overview of the PLC Math Sessions

- Participants will engage virtually in 1-hour math content specific
- PLCs Leaders are TDG staff and teachers leaders from the Math in Real Life Project
- Time frame: Between April 20 and June 5, 2020
- Instructors: Kathy Pfaendler and other TDG Consultants

In these virtual PLC meetings sessions, teachers will receive support to:

- use district curriculum materials to design and analyze student math tasks (especially modeling tasks) for rigor and cognitive demand
- determine ways to discuss student math strategies and create equitable student engagement during distance learning
- celebrate, troubleshoot and brainstorm with other educators also engaged in distance student learning of mathematics
- identify equitable teaching and learning practices embedded, in both implicit and explicit ways, within the Math Habits and Routines during distance learning
