Addiction and Cognition

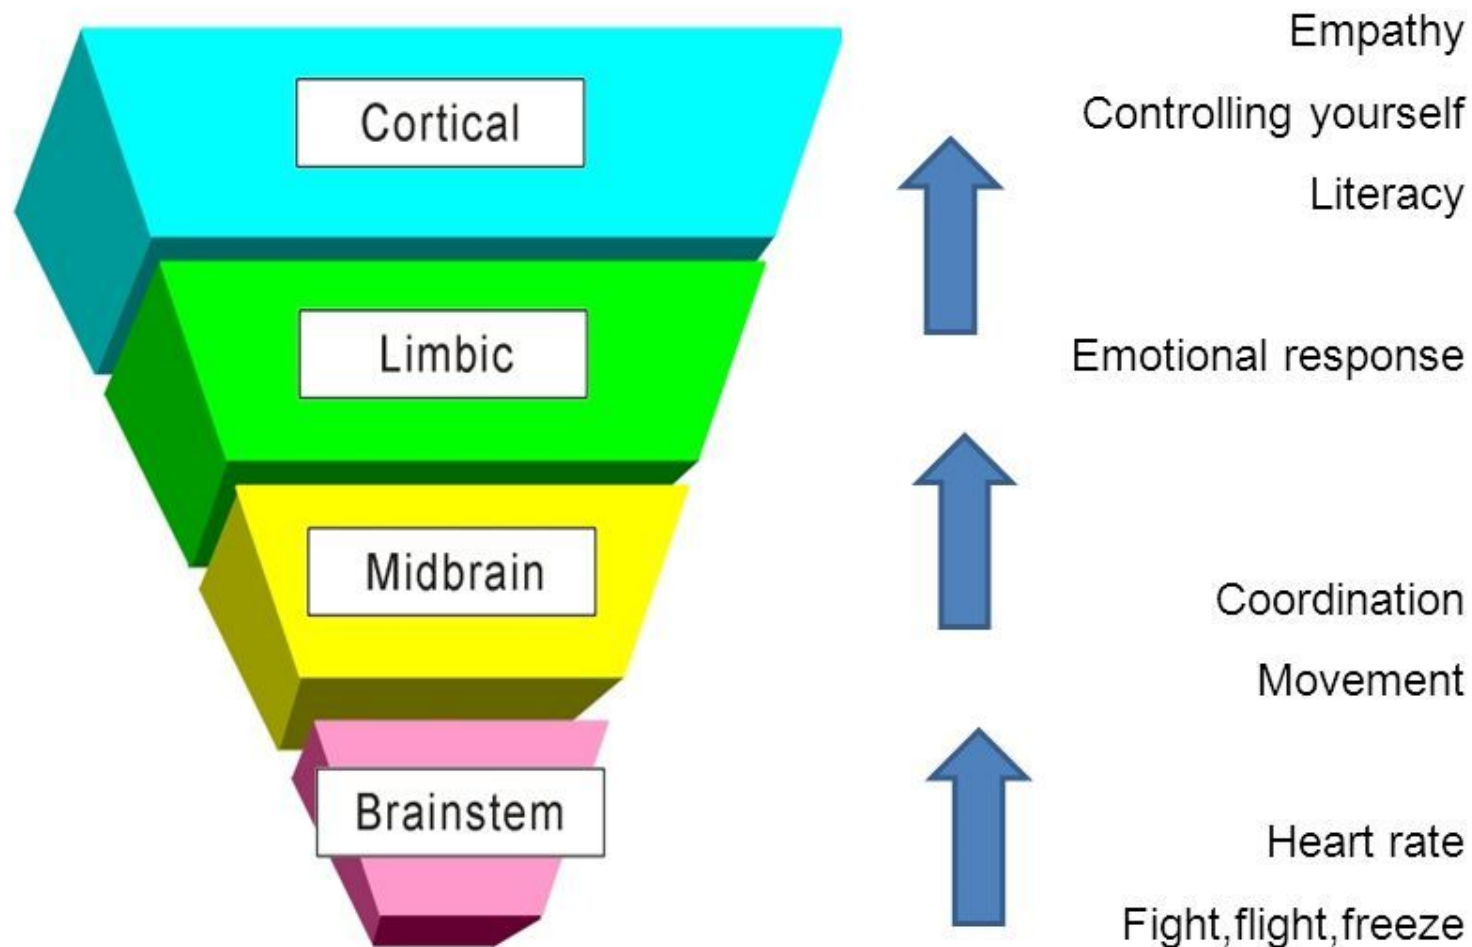

The brain regions and neural processes that underlie addiction overlap extensively with those that support cognitive functions, including learning, memory, and reasoning.

From a psychological and neurological perspective, addiction is a disorder of altered cognition.

--Thomas J. Gould, PhD

Perry's Neurosequential Model

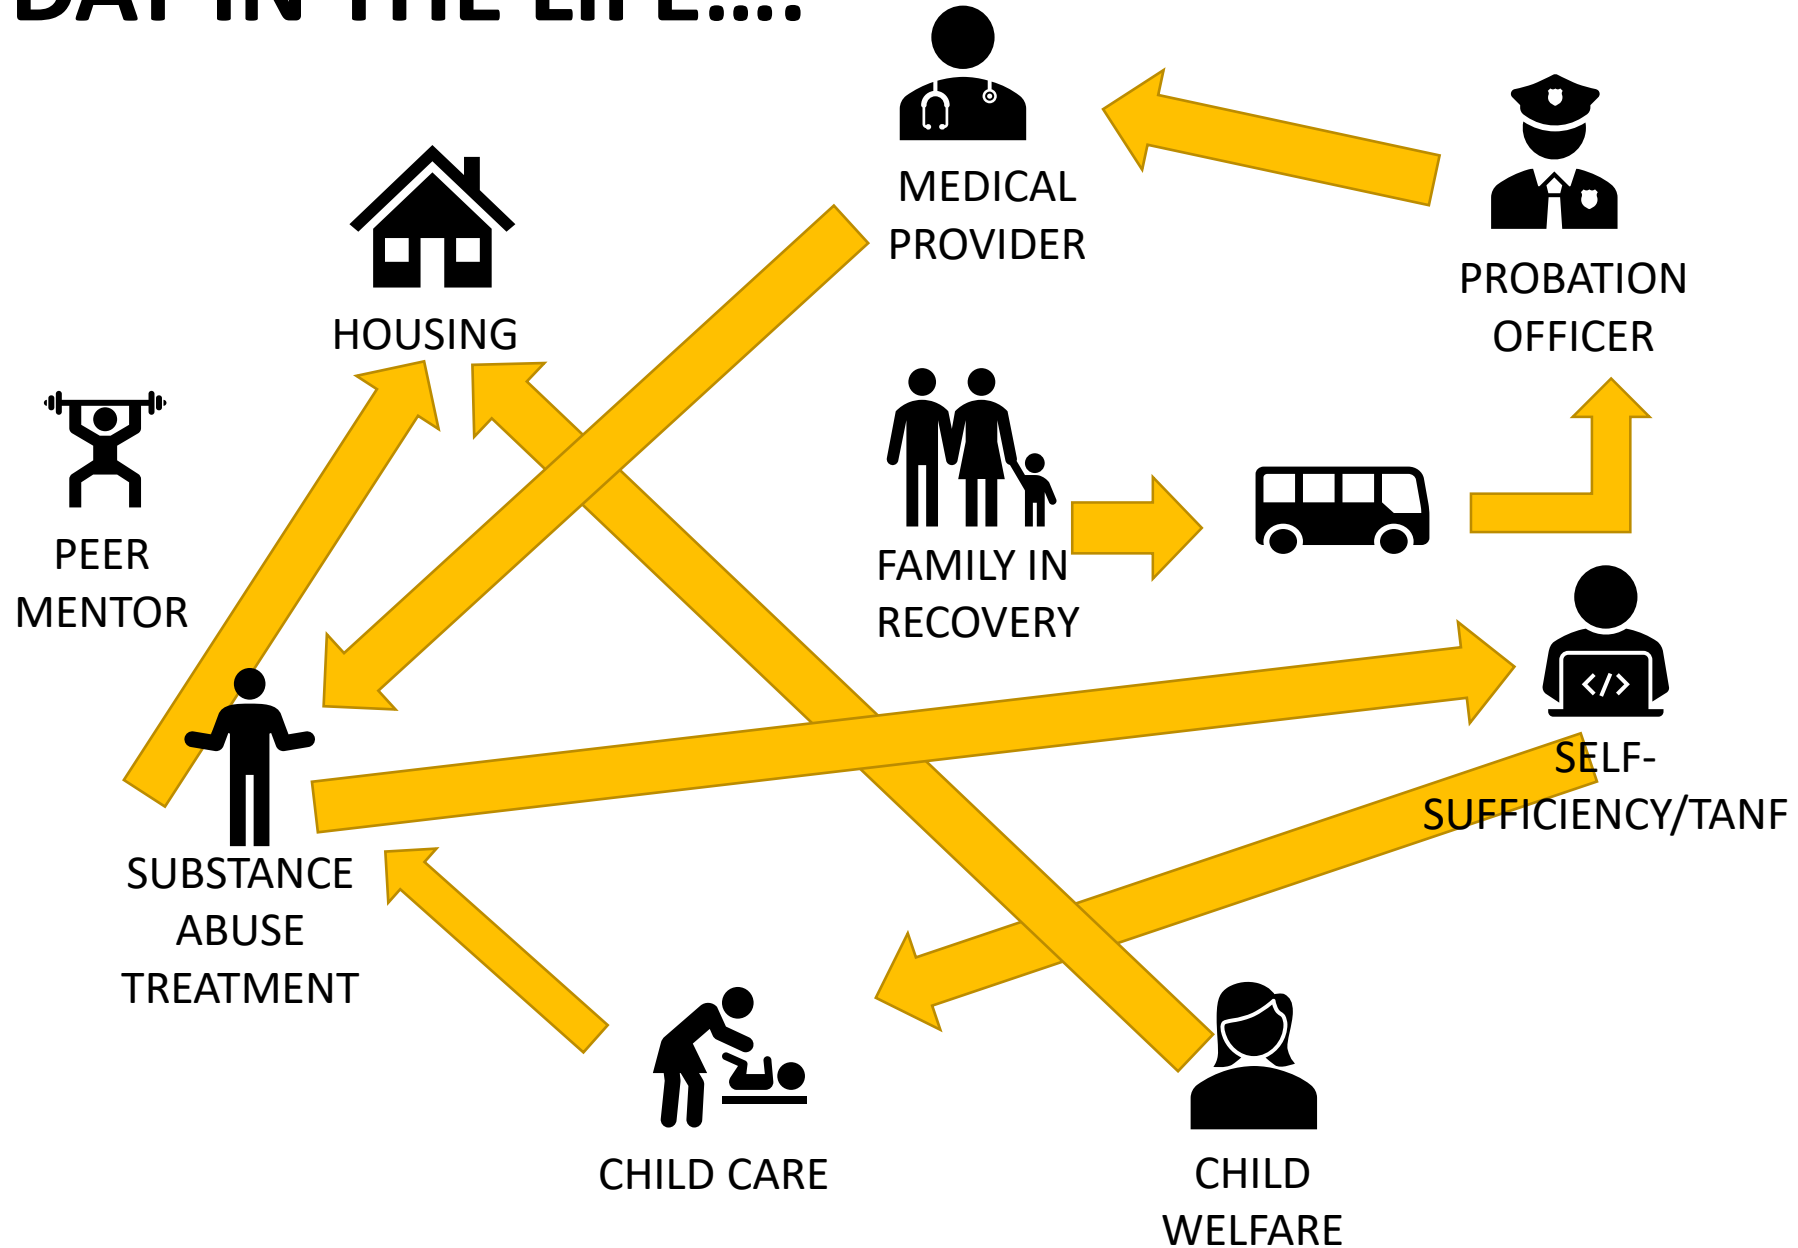

Perry, B.D. (2002). *Brain Structure and Function I: Basics of Organisation*. Adapted in part from "Maltreated Children: Experience, Brain Development and the Next Generation (W.W. Norton & Company).

| | | | | | |
|--|--------------------------------------|-----------------------------------|----------------------------------|-------------------------------------|--------------------------------------|
| Sense of Time | Extended Future | Days Hours | Hours Minutes | Minutes Seconds | Loss of Sense of Time |
| Primary secondary Brain Areas | NEOCORTEX <i>Subcortex</i> | SUBCORTEX <i>Limbic</i> | LIMBIC <i>Midbrain</i> | MIDBRAIN <i>Brainstem</i> | BRAINSTEM <i>Autonomic</i> |
| Cognition | Abstract | Concrete | Emotional | Reactive | Reflexive |
| Mental State | CALM | ALERT | ALARM | FEAR | TERROR |

A DAY IN THE LIFE....

Oasis Center Multidisciplinary Team MDT

Approach clients/patients from a neurobiologically informed perspective. Ask the question: *“What kind of planning is this person’s brain capable of right now?”*

Coordinate the requirements of various involved agencies to give clients/patients the best chance of success

Provide a supportive, non-punitive team approach. People who believe they can succeed are much more likely to do so than those who don’t

-
- Weekly meeting
 - Child Welfare
 - Community Justice
 - Treatment Providers
 - Self-Sufficiency
 - Oasis Physician

A close-up photograph of a pregnant woman's midsection. She is wearing a bright orange long-sleeved shirt. Her hands are positioned over her belly, with her fingers interlaced to form a heart shape. She is wearing a ring on her left ring finger and a band on her right ring finger. The background is blurred, showing what appears to be autumn leaves.

Nurture Oregon

The Oasis Center in partnership with Nurture Oregon supports pregnant women who struggle with drugs and alcohol during their pregnancy, and continues to support them, their family, and their baby.

- Engagement at any stage of pregnancy
- Support entry in substance use treatment
- Harm Reduction
- Group Care Model
- Peer Support
