	GoTalk Button	AT-001 A	Communication	The GoTalk button records one 10-second message. Several GoTalk Buttons can be used as auditory cues to outline steps or prompts within a space. Offers additional hanging options with magnetic back. The GoTalk Button (comes with 2) also includes pocket communication books in this collection of low tech communication tools.	
	GoTalk Button	AT-001 B	Communication	The GoTalk button records one 10-second message. Several GoTalk Buttons can be used as auditory cues to outline steps or prompts within a space. Offers additional hanging options with magnetic back. The GoTalk Button (comes with 2) also includes pocket communication books in this collection of low tech communication tools.	
	Little Step-by-Step Communicator	AT-003	Communication	The Little Step-by-Step Communicator is ideal for turn-taking, giving a series of instructions, or expressing thoughts in a way more like natural speech. Record a series of messages to this dedicated speech generating device and then activate the 2.5-in/6.35-cm switch top to play each message back one at a time. Includes 4-minutes of record time, three recording levels, and supports the use of an external switch for alternative methods of access. One battery operated toy or appliance can also be controlled from the switch.	

	BIGmack Communicator	AT-004 A	Communication	<p>Start your communication journey with a BIGmack speech device. With a press of the large colored top, an individual can communicate a single message up to 2-minutes long. New messages are easily and quickly recorded to the BIGmack on the fly throughout the day to provide opportunities to communicate in almost any scenario. Request like "I want" or "I need help" Participate in an activity with "turn the page" or "It's your turn" Tell your classmates what you did over the weekend during a morning meeting Add communication to a switch controlled toy or appliance.</p>	
	BIGmack Communicator	AT-004 B	Communication	<p>Start your communication journey with a BIGmack speech device. With a press of the large colored top, an individual can communicate a single message up to 2-minutes long. New messages are easily and quickly recorded to the BIGmack on the fly throughout the day to provide opportunities to communicate in almost any scenario. Request like "I want" or "I need help" Participate in an activity with "turn the page" or "It's your turn" Tell your classmates what you did over the weekend during a morning meeting Add communication to a switch controlled toy or appliance.</p>	
	BIGmack Communicator	AT-004 C	Communication	<p>Start your communication journey with a BIGmack speech device. With a press of the large colored top, an individual can communicate a single message up to 2-minutes long. New messages are easily and quickly recorded to the BIGmack on the fly throughout the day to provide opportunities to communicate in almost any scenario. Request like "I want" or "I need help" Participate in an activity with "turn the page" or "It's your turn" Tell your classmates what you did over the weekend during a morning meeting Add communication to a switch controlled toy or appliance.</p>	
	Pull-Talk	AT-005	Communication	<p>Pull-Talk is a handheld device that features 5 clear pockets (for images, words, or photos) and a detachable, retractable belt clip. Benefits include improvements in communication skills, independence, and self confidence.</p>	

	Voice Cue	AT-006 A	Communication	Voice Cue is a discrete auditory cueing device. Record up to five messages (60 seconds total recording time) and set the clock to play back messages at preset times.	
	Voice Cue	AT-006 B	Communication	Voice Cue is a discrete auditory cueing device. Record up to five messages (60 seconds total recording time) and set the clock to play back messages at preset times.	
	GoTalk 9+ (Lite Touch)	AT-007	Communication	This lightweight communication device has a 45 message capacity (9 keys, each about 2 inches, and 5 recording levels). The first row of three "core messages" stays the same on each level.	
	GoTalk 20+	AT-008 A	Communication	This lightweight communication device has a 100 message capacity (20 keys, each 1 inch, and 5 recording levels). The first row of five "core messages" stay the same on each level.	
	GoTalk 20+	AT-008 B	Communication	This lightweight communication device has a 100 message capacity (20 keys, each 1 inch, and 5 recording levels). The first row of five "core messages" stay the same on each level.	
	iPad 10.9 inch	AT-060 A	Communication	Our iPad is loaded with Proloquo2Go, Pictello, 4Text, Keedogo Plus, and Lamp Words For Life - all fantastic apps to try out for helping students with communication at various levels, both verbal and non-verbal. Lamp WFL can even be used for advanced communication. iPad checkout can be combined with mouth or head stylus for students with limited mobility to gain access to these technologies as well.	
	iPad 10.9 inch	AT-060 B	Communication	Our iPad is loaded with Proloquo2Go, Pictello, 4Text, Keedogo Plus, and Lamp Words For Life - all fantastic apps to try out for helping students with communication at various levels, both verbal and non-verbal. Lamp WFL can even be used for advanced communication. iPad checkout can be combined with mouth or head stylus for students with limited mobility to gain access to these technologies as well.	

	Cheap Talk 4	AT-061	Communication	<p>The In-Line Direct has four message squares and plays one of the 5-second messages when you press the corresponding square. Each square is approximately 1.5". We've also included some basic BoardMaker icons to assist with the usage of the device, but further icons will need to be created to customize the experience with the student.</p>	
	SmartTalk	AT-172	Communication	<p>Get students talking with Smart Talk, the interactive electronic learning aid that introduces and reinforces the essential vocabulary English Language Learners and all children with limited vocabularies need to know and use every day. This is an engaging program of association and repetition. Students SEE a photograph, HEAR the word associated with the picture, and then REPEAT the word over and over, practicing their pronunciation until they've added the word to their spoken vocabulary.</p>	
	FL4SH Scanning Communicator	AT-176	Communication	<p>FL4SH features a vibrant and highly visible light source that literally frames each picture symbol in succession. Four message locations; 16 minutes of recording time with variable message lengths.</p>	
	Short Messages Kit	AT-205 A	Communication	<p>A set of recordable communication devices. This kit includes one Gotalk Button, one talking photo card, and one 90 second digital recording unit.</p>	
	Short Messages Kit	AT-205 B	Communication	<p>A set of recordable communication devices. This kit includes one Gotalk Button, one talking photo card, and one 90 second digital recording unit.</p>	
	iTalk2	AT-212 A	Communication	<p>Using the iTalk2 communicator will provide opportunities for students to experience the advantage of two-message communication. They can be engaged in learning communication skills by commenting, making choices, and telling jokes.</p>	
	iTalk2	AT-212 B	Communication	<p>Using the iTalk2 communicator will provide opportunities for students to experience the advantage of two-message communication. They can be engaged in learning communication skills by commenting, making choices, and telling jokes.</p>	

	Eye Pics Organizer	AT-227	Communication	The front has a screened grid that can be used as a scheduler, a task organizer, or a communication board and book. The back cover has been left blank for those who choose to customize the product for their own unique use.
	Four Compartment Communicator with Speech and Lights	AT-292	Communication	Place objects, pictures, or words in each of the compartments. Activating the switch plate plays the message while turning on one light at a time. Five seconds of recording time per compartment, making twenty seconds of total recording time
	Totally Tactile Communicator	AT-293	Communication	This tactile communicator has six levels for a total of 36 messages, with 7 seconds per message. Around the outside are six plates with different large textures where you record and play back your messages.
	Step By Step Communicator	AT-294	Communication	Move into multi-message communication with the LITTLE Step-by-Step speech device. Activate the colored top to play the first message. When done, activate the top again to play another message. New sequences of messages are easily and quickly recorded to the LITTLE Step-by-Step on the fly, or use the levels pre-record up to three sets of messages ahead of time.
	Cheap Talk 8	AT-295	Communication	The Cheap Talk 8 allows you to record and re-record eight messages with 37.5 second per message.
	Eye Talks	AT-302	Communication	A low tech version of eye-gaze, teaching the student to communicate with their eyes, which you can track through the clear shatter-resistant plastic. Comes with two self-contained adjustable triangle stands.
	ChoiceWorks Visual Support System	AT-316	Communication	ChoiceWorks is a learning tool that uses a combination of 3 structured boards, visual images, and built in choice making opportunities to effectively help children complete daily routines (morning, day, and night), understand & control their feelings, and improve their waiting skills (taking turns, not interrupting).
	Picture Tote	AT-319 A	Communication	The Picture Tote measures 15"x14" with 6 clear pockets (6 1/4"x 3 1/2") for holding a variety of sized communication symbols. There's plenty of room inside the tote for extra cards, personal items, and more.

	Picture Tote	AT-319 B	Communication	The Picture Tote measures 15"x14" with 6 clear pockets (6 1/4"x 3 1/2") for holding a variety of sized communication symbols. There's plenty of room inside the tote for extra cards, personal items, and more.	
	Story Time Communication Boards	AT-321	Communication	80 Communication Board Games (40 double-sided boards) and 240 picture-vocabulary cards with Picture Communication Symbols (PCS) to help no-verbal children recognize and use vocabulary from 20 popular storybooks. This versatile teaching tool allows students with language delays, autism, and other communication disorders to participate in reading activities using Mayer Johnson's Boardmaker Picture Communication Symbols.	
	Functional Communication Games	AT-322	Communication	88 Communication Board Games (44 double-sided boards) using Boardmaker Picture Communication Symbols (PCS) to teach non-verbal students to communicate. 11 topic areas with 396 question cards targeting receptive (198) and expressive (198) language skills. The five game formats cover daily topics and allow students with varying motor and verbal skills to participate.	
	PCS Learning Magnets	AT-341	Communication	These magnets help teach words and encourage students to make requests. The kit includes magnets for the most common verbs, nouns, and descriptive words.

	Keys U See Keyboard (ivory)	AT-018 A	Computer Access	These large print keyboards are perfect for those who simply have a hard time seeing the existing commands on their keyboards. With a bigger and bolder typeface, the keys are easier to see and use.	
	Keys U See Keyboard (ivory)	AT-018 B	Computer Access	These large print keyboards are perfect for those who simply have a hard time seeing the existing commands on their keyboards. With a bigger and bolder typeface, the keys are easier to see and use.	
	VisionBoard 2	AT-019	Computer Access	The VisionBoard has big 1" oversized keys for better control and contact, large, bold letters and numbers to improve readability, and high-contrast white-on-black or black-on-yellow lettering, proven to be easier on the eyes. Great for low vision users and those with lower dexterity.	

	Intellikeys Keyboard	AT-020	Computer Access	<p>The Intellikeys is a programmable alternative keyboard that plugs into any computer running Windows. It enables students with physical, visual or cognitive disabilities to easily type, enter numbers, navigate on-screen displays and move the mouse. The IntelliKeys has built-in features that allow even those with some of the most severe physical difficulties to use it. The keyboard comes with a special setup overlay that gives you easy access to these features. The newer USB version allows you to access these options through a system tray icon as well.</p>	
	Adjustable Mouth Stylus	AT-032	Computer Access	<p>The Adjustable Touch Screen Mouth Stylus is comfortable, lightweight, and works with the slightest touch. Its telescoping stainless steel shaft easily adjusts from 8½" to 24". The plastic bite plate with rubber sleeves allows the user to firmly yet comfortably hold the stylus. Comes with an extra pair of protective thermoplastic rubber sleeves for the bite plate. Just adjust the length of the stylus and use on touch screen surfaces including smartphones, iPads and Android tablets. Replaceable tips available separately. Mouth Stylus Size: 3/8"Diameter x 8½" to 24"L. Weight: ½ lb.</p>	
	Adjustable Head Stylus	AT-033	Computer Access	<p>The Adjustable Touch Screen Head Stylus an essential aid for people with limited hand use. Our telescoping stylus is mounted on a light and comfortable headpiece and works with the slightest touch on your tablet, smartphone or computer. Headpiece adjustable. One size fits all; fits directly on head. Adjustable nylon straps with non-slip rubber inserts; polycarbonate buckles. Measures 6 to 7 inches in diameter; stretches to 12 inches in diameter; Stylus adjusts from 9" to 20"L. Weight: ½ lb.</p>	

	Optima Joystick Switch	AT-062	Computer Access	The OPTIMA Joystick is a compact, desktop joystick that does not require fine motor skills and is suitable for a wide spectrum of computer users. The Optima Joystick is specifically designed for cursor movement to respond to the lightest touch (0.5 Newtons) for accurate, cursor navigation and precise targeting of objects on the computer screen. The Optima Joystick also features a low profile providing a natural hand rest for comfortable operation, and will work with PS2 and USB compatible computers.	
	Logitech Marble Mouse	AT-102	Computer Access	Logitech Marble Mouse offers an ambidextrous design, comfortable for left-handed or right-handed users, with an ergonomic design that supports the whole hand. If you press the large keys at the same time, you can use the ball to scroll.	
	Little Fingers Keyboard	AT-156	Computer Access	The Little Fingers keyboard is sized to fit children's smaller hands. It incorporates a space-saving layout which includes all of the most commonly used keys. Plugs into the USB port on your computer.	
	BigTrack Mouse	AT-181 A	Computer Access	Bright large trackball with oversized buttons allows for second mouse connection. Easy plug and installation. Windows and Mac compatible.	
	BigTrack Mouse	AT-181 B	Computer Access	Bright large trackball with oversized buttons allows for second mouse connection. Easy plug and installation. Windows and Mac compatible.	
	Switch Adapted Mouse	AT-182	Computer Access	Standard mouse with two standard 1/8" plugs for two switches. Its left and right mouse clicks have been adapted so that you can use a switch for activation.	
	Flexible Keyboard	AT-260 A	Computer Access	A spill proof, portable, flexible keyboard.	
	Flexible Keyboard	AT-260 B	Computer Access	A spill proof, portable, flexible keyboard.	
	Chester Mouse	AT-325 A	Computer Access	ChesterMouse is a tiny, single-button mouse with no scroll wheel, made for smaller hands. It's easy to control and made of rugged plastic for strength and durability.	
	Chester Mouse	AT-325 B	Computer Access	ChesterMouse is a tiny, single-button mouse with no scroll wheel, made for smaller hands. It's easy to control and made of rugged plastic for strength and durability.	

	Tiny Mouse	AT-326 A	Computer Access	<p>Chester Creek's TinyMouse is about half the size of a standard computer mouse and just right for a child's small hands. A scroll wheel and colored right and left buttons help kids learn to click and move the cursor with greater comfort and control. And with optical tracking, there is no trackball to become dirty, lost, or to malfunction.</p>	
	Tiny Mouse	AT-326 B	Computer Access	<p>Chester Creek's TinyMouse is about half the size of a standard computer mouse and just right for a child's small hands. A scroll wheel and colored right and left buttons help kids learn to click and move the cursor with greater comfort and control. And with optical tracking, there is no trackball to become dirty, lost, or to malfunction.</p>	
	Tiny Mouse	AT-326 C	Computer Access	<p>Chester Creek's TinyMouse is about half the size of a standard computer mouse and just right for a child's small hands. A scroll wheel and colored right and left buttons help kids learn to click and move the cursor with greater comfort and control. And with optical tracking, there is no trackball to become dirty, lost, or to malfunction.</p>	
	Livescribe Pulse Smartpen	AT-354	Computer Access	<p>The Livescribe Pulse Smartpen records everything you hear, say, and write, and links your audio recording to your notes based on the dot pattern on a special notebook. Using Livescribe Desktop, you can save notes to your computer and even search for words within your notes.</p>	
	Keyboard with Keyguard	AT-364	Computer Access	<p>The keyboard with keyguard isolates the keys, which helps to stabilize and position fingers or pointers. The keyguard is attached to the keyboard, eliminating the guesswork of matching up a keyguard to a keyboard. The keyguard is reinforced for stiffness.</p>	

	Pretorian iPad Switch Interface	AT-369	Computer Access	<p>It can be used with switch adapted apps, iOS Switch Control/Android® Switch Access or simply to play music/video or take photos. APPLICATOR has been the Bluetooth switch access device of choice for teachers, OTs and health professionals alike since iPad was first adopted for AT use. Pair APPLICATOR with your iPad® by selecting it in the Bluetooth menu (no PIN entry required) Connect any wired switches to one or more of the four, programmable, switch inputs. Using the built-in display, select the function of each switch from the choice of 24 keyboard/media commands. Any combination of switch functions is possible.</p>	
	<b>Asset Name</b>	<b>Asset Tag</b>	<b>Category</b>	<b>Notes</b>	<b>Checkout Date</b>
	Coin Calculator	AT-023	Math	<p>Instead of standard numbers on a regular calculator, this device uses realistic coin buttons and a dollar bill. The talking Coin-U-Lator says the amount as it is entered, and gives verbal prompts when needed.</p>	
	See-and-Solve Calculator	AT-178	Math	<p>A step-by-step visual four-function calculator which can be set up vertically or horizontally.</p>	
	Talking Calculator	AT-180	Math	<p>Simplify arithmetic by providing a calculator with speech output. It voices numeric entries and computations in easy-to-understand speech. For totals, choose between the complete number speech, seventy-eight, or the digit-by-digit seven, eight. Features volume control, mute option, and angled display. Designed for desktop use. Requires two AAA batteries.</p>	
	Math Stamps	AT-183	Math	<p>Fraction Pie Stamps, Numberline Stamps, and Thermometer Stamps help add a visual and kinesthetic component to teaching fractions and numbers</p>	

	Flexitable: Addition/Subtraction	AT-184 A	Math	<p>The Flexitable is an innovative educational tool designed to make learning addition and subtraction a hands-on and engaging experience. Measuring 7 ¾" square, this ingenious grid boasts vertical and horizontal channels molded into soft, pliable plastic. The unique material and design allow children to fold and unfold it repeatedly to discover the correct answers to their addition and subtraction problems, all with sums up to 20. The Flexitable is the perfect combination of visual, tactile, and kinesthetic learning, making math concepts come to life in a whole new way.</p>	
	Flexitable: Fractions/Decimals	AT-184 B	Math	<p>The Flexitables grid is a fantastic tool for visualizing and grasping the intricacies of fractions, percentages, and decimals. Here's how it works: The front face showcases the relationship between fractions and percentages, while the reverse reveals equivalent decimal values. By folding the grid along the vertical channels, students can easily discover connections, like how 1/4 equals 25% and 0.25, and so on. Repeated folding and unfolding allow students to explore and find equivalent fractions, percentages, and decimals that sum up to 1.</p>	
	Flexitable: Multiplication/Division	AT-184 C	Math	<p>Flexitables make learning multiplication and division a breeze! Here's how they work: Identify the numbers you want to multiply or divide. Locate the multiplier (in red) along the top row and the multiplicand or divisor (also in red) down the left-hand column. Fold the table vertically under the chosen multiplier. Keep the table folded and find the other number along the left-hand column. Fold the table horizontally under this number. In the right-hand corner, you'll discover the answer.</p>	
	Hands on Money Kit	AT-187	Math	<p>This kit includes fake bills from \$1 to \$100. Coins are full color, actual size, on cardboard with a generous supply of pennies to gold dollar coins, all packed in an organizer box. Money books are laminated with full-color images for coins and bills, providing visual examples of bill and coin groups for various values.</p>	

	Head Full of Numbers Tabletop Game	AT-193	Math	Ages 7+. Head Full of Numbers is a fun, fast-paced math game. Shake, roll, and create math equations. Race against the clock and create the most math equations to win.	
	Kookee Jar the Game	AT-226	Math	This cookie-themed dice game helps students learn the difference between right and left while they count, graph, add, and subtract cookies. Fine motor skills are also developed as students pick up and transfer the round plastic cookies.	
	<b>Asset Name</b>	<b>Asset Tag</b>	<b>Category</b>	<b>Notes</b>	<b>Checkout Date</b>
	Adaptive Cutting Devices	AT-189	Motor	Adaptable handle with four different features to allow for many physical abilities. Comes with Adapt-a-Hold to hold paper in place while your student cuts with Adapt-a-Cut	
	Flexi-Cutlery	AT-216	Motor	Flexi-Cutlery is ideal for anyone with limited hand movement or grip. The design allows the user to wrap the flexible forearm handles around their hand, wrist, or arm. Kit includes a spoon, fork, and splayed spoon.	
	Wii Interactive System for Adaptive PE	AT-241	Motor	Wii Interactive System (television required) includes bowling, tennis, baseball, golf, fitness, and many other activities with the Wii interactive system. Have an OT, PT, or a member of your district's AT team sign off on the request. Includes: 1 Wii console 1 Wii Fit balance board 1 Console stand 1 Sensor Bar 1 AC adapter 1 AV cable 2 remotes 2 nunchuks 1 battery charger	
	Animal Hopscotch Playmat	AT-265	Motor	Musical playmat makes movement fun while learning animal names and hand-eye coordination.	
	Ellie Grip	AT-290	Motor	This "sock" pal teaches students how to hold a pencil. Each Ellie Grip has two properly located holes for the first finger and thumb. The rest of the fingers remain inside the sock. Available in right hand and left hand.	
	Foam Bowling Set	AT-291	Motor	This set includes six thick foam pins and a foam bowling ball to help encourage hand eye coordination.	
	Magnetic Wand Page Turner	AT-299	Motor	Students who have difficulty turning pages can gain independence with this magnetic wand page turner. The team can help the student by adding paperclips to each page, then the student will be able to use the magnet wand to turn each page with ease.	

	Magnetic Dartboard Set	AT-304	Motor	Reversible dart board offers two playing surfaces to choose from. Weighted darts have magnetized ends.	
	Switch Adapted Scissors	AT-312	Motor	Easy-to-use switch-adapted scissors allow participation in art and other classroom or home activities. Connect a switch to activate and the scissors will easily cut through paper. Easy to remove from special mounting.	
	Hi-Write Mega-Mazes	AT-345 A	Motor	Hi-Write Mega-Mazes encourage fine motor control, writing skills, crossing midline, and visual tracking.	
	Hi-Write Mega-Mazes	AT-345 B	Motor	Hi-Write Mega-Mazes encourage fine motor control, writing skills, crossing midline, and visual tracking.

	Over the Chair Storage Buddy	AT-104 A	Organization	Over the Chair Storage Buddy fits most school chairs and includes pockets of varying sizes to hold and organize different school supplies while draped over the back of the chair.	
	Over the Chair Storage Buddy	AT-104 B	Organization	Over the Chair Storage Buddy fits most school chairs and includes pockets of varying sizes to hold and organize different school supplies while draped over the back of the chair.	
	Wrist Time Timer	AT-191	Organization	The Time Timer Wrist Timer is a time management tool, even for those who can't tell time. At a glance, you will know how much time is left for your task. It is ideal for children with attention difficulties, learning disabilities, behavioral issues, or sensory processing disorder.	
	Light, Sound, and Vibrating Timer	AT-288	Organization	Small, digital timer for students who need to keep track of time in different ways. This versatile timer includes notifications that vibrate, make a sound, or flash. You can select any single or combination of alarms.	
	MotivAider	AT-297	Organization	The MotivAider works by periodically sending the child a silent signal - the entire device gently vibrates. The vibration is used to privately convey a personal message such as "it pays to pay attention," or "slow and steady wins the race" that reminds and urges the child to make a desired change.	

	Time Timer 8"	AT-356 A	Organization	Students can see how much time remains for testing, reading, or other classroom activities. Set the battery operated timer to the amount of time a task requires: the red indicator moves as time passes and the clock beeps when time is up. (The digital beep is optional and can be turned off to be a silent timer). Size: 8"	
	Time Timer 8"	AT-356 B	Organization	Students can see how much time remains for testing, reading, or other classroom activities. Set the battery operated timer to the amount of time a task requires: the red indicator moves as time passes and the clock beeps when time is up. (The digital beep is optional and can be turned off to be a silent timer). Size: 8"	
	Time Timer 12"	AT-357 A	Organization	Students can see how much time remains for testing, reading, or other classroom activities. Set the battery operated timer to the amount of time a task requires: the red indicator moves as time passes and the clock beeps when time is up. (The digital beep is optional and can be turned off to be a silent timer). Size: 12"	
	Time Timer 12"	AT-357 B	Organization	Students can see how much time remains for testing, reading, or other classroom activities. Set the battery operated timer to the amount of time a task requires: the red indicator moves as time passes and the clock beeps when time is up. (The digital beep is optional and can be turned off to be a silent timer). Size: 12"

	LightWedge Mini Magnifier	AT-025 A	Reading	This compact pocket reading light magnifies letters by 1.5x and has a built in reading light. Helpful in dim lighting and for students with visual impairment. Light stays localized, so it is the perfect assistive device without causing any disturbance to surrounding students. Comes with protective carrying case.	
	LightWedge Mini Magnifier	AT-025 B	Reading	This compact pocket reading light magnifies letters by 1.5x and has a built in reading light. Helpful in dim lighting and for students with visual impairment. Light stays localized, so it is the perfect assistive device without causing any disturbance to surrounding students. Comes with protective carrying case.	

	Framed Focused Reading Kit	AT-028 A	Reading	Hellen Keller leveled reading book included with Easy Focus Frames and EZ Return Sweep Strips to try out this low tech solution for line tracking issues and overstimulation from high contrast.	
	Highlighter Reading Practice	AT-028 B	Reading	Wide variety of highlighter tape colors and sizes as well as removable highlighter sheets included with Harold the Hungry Plant Benchmark Booklet to test out these helpful study aids. Removable highlighter sheets lessen page contrast, which can help for students experiencing eye fatigue.	
	Padded Lap Book Stand with Storage	AT-035	Reading	Ergonomic book stand can be used on your lap, a table, or other surface, offering a convenient hands-free reading experience as book holders for reading hands free. It also serves as a paper stand, crafted from 8mm wood, offering outstanding durability and resistance to scratches, abrasion, fading, and water. Adjustable to 5 different angles for ergonomic reading.	
	Magnetic Boards and Letters	AT-042 A	Reading	A collection of magnetic boards, magnetic easels, and thick foam magnet alphabet letters as well as alphabet dice to create fun, hands-on learning of the basics.	
	Magnetic Boards and Letters	AT-042 B	Reading	A collection of magnetic boards, magnetic easels, and thick foam magnet alphabet letters as well as alphabet dice to create fun, hands-on learning of the basics.	
	PortaBook Stand	AT-043	Reading	Porta-Book is a lightweight and portable stand designed for laptops/notebooks, tablets and books. Its multifunctional ergonomic design provides the perfect reading/viewing height and angle. Meant to help improve posture, concentration, and to reduce eye, neck, and back strain.	
	Pen Friend 3	AT-058	Reading	This audio labeler for blind and low vision users lets you label anything and everything with discreet audio labels all in your own voice. Easily record and re-record information using this versatile, pocket-sized, easy-to-use labeling system. You can instantly play back the recordings anywhere simply using the PenFriend 3. It has 4 simple yellow tactile operating buttons that contrast against the black casing of the device. These buttons are designed to make them easier to locate and use.	

	Reader 2	AT-059 A	Reading	<p>The C-Pen Reader 2 is a fast paced text to speech device, perfect for assisting students with dyslexia to build reading confidence and independence. Everything scanned can be stored and reviewed later in Reader 2's memory. It also has built in dictionaries which help with vocabulary support, both in definitions and in pronunciation. The Reader 2 can read in English, French, Italian, or Spanish, with accent variations.</p>	
	Reader 2	AT-059 B	Reading	<p>The C-Pen Reader 2 is a fast paced text to speech device, perfect for assisting students with dyslexia to build reading confidence and independence. Everything scanned can be stored and reviewed later in Reader 2's memory. It also has built in dictionaries which help with vocabulary support, both in definitions and in pronunciation. The Reader 2 can read in English, French, Italian, or Spanish, with accent variations.</p>	
	Reader 2	AT-059 C	Reading	<p>The C-Pen Reader 2 is a fast paced text to speech device, perfect for assisting students with dyslexia to build reading confidence and independence. Everything scanned can be stored and reviewed later in Reader 2's memory. It also has built in dictionaries which help with vocabulary support, both in definitions and in pronunciation. The Reader 2 can read in English, French, Italian, or Spanish, with accent variations.</p>	
	Reader 2	AT-059 D	Reading	<p>The C-Pen Reader 2 is a fast paced text to speech device, perfect for assisting students with dyslexia to build reading confidence and independence. Everything scanned can be stored and reviewed later in Reader 2's memory. It also has built in dictionaries which help with vocabulary support, both in definitions and in pronunciation. The Reader 2 can read in English, French, Italian, or Spanish, with accent variations.</p>	

	Mark-My-Time Digital Bookmark	AT-108 A	Reading	This digital bookmark helps track how long the student is reading, to help track required reading times. There are two modes to choose from: a countdown with an alarm to celebrate completion of a timed reading assignment, or a cumulative timer which stores up to 100 hours of reading time over multiple sessions until the reader chooses to delete it. There is also a 60-second countdown/count up feature displays seconds at the one-minute mark to aid in fluency checks. Dimensions: 1-3/4" x 7-3/4"

	4-in-1 Joystick	AT-031	Switch Access	<p>The 4-in-1 Joystick Switch is activated by the user's hand or finger. The user can move the joystick in any direction to play with a toy, activate a device and more. Add the switch to activate adapted devices, like adaptive game system controllers and remote-control toys, for accessible fun. You can connect up to four cords to switch-activated devices using the jacks on the side of the joystick. Push the joystick in the device's direction to activate it.</p>	
	Wobble switch with gooseneck	AT-036	Switch Access	<p>A popular choice for users who lack the upper extremity control necessary for other types of switches, wobbles can be activated by any gross motor movement that swipes its lever.</p>	
	Big Beamer Switch	AT-052	Switch Access	<p>Big Beamer Wireless Transmitter brings reliable, immediate switch access without the hassle of cords. Multiple Big Beamers can be used in the same room at the same time, from as far away as 30-feet, without interference.</p>	
	Specs Switch	AT-053	Switch Access	<p>With a 1 3/8-in/3.5-cm activation surface, the Specs switch is small enough to be worn, but is most often used as a mounted switch. The Specs switch includes a space saving flush base and a strap base for mounting around items. 24-inch strap included.</p>	
	Buddy Button Switch	AT-054	Switch Access	<p>The Buddy Button is a durable and reliable single switch that requires only the slightest touch of its 2.5-in/6.4-cm surface for activation.</p>	
	LITTLE Candy Corn 2	AT-055	Switch Access	<p>The NEW LITTLE Candy Corn 2 accessibility switch uses highly-sensitive proximity sensor technology for activation. Any time the user is near or touching the activation surface, the LITTLE Candy Corn accessibility switch will activate. The medium-sized activation surface is suitable for most users. When activated, an auditory beep and light appear. You may turn off the auditory beep and light if the user does not need these prompts.</p>	

	BIG Candy Corn 2	AT-056	Switch Access	<p>The BIG Candy Corn accessibility switch uses highly-sensitive proximity sensor technology for activation. Any time the user is near or touching the activation surface, the BIG Candy Corn accessibility switch will activate. Individuals with fine motor impairments or low vision prefer the BIG Candy Corn over the LITTLE Candy Corn accessibility switch because it has an activation surface nearly two times the size. When activated, an auditory beep and light appear. You may turn off the auditory beep and light if the user does not need these prompts.</p>	
	MultiSwitch by Inclusive Tech	AT-092 A	Switch Access	<p>The MultiSwitch accepts up to six switches, enabling you to use it with everyone who needs switches to access the computer. Touch sensitive buttons on the device allow you easily test the functions of the switches, or you can use the buttons as switches. The MultiSwitch can also be used to enable switch access to mouse movement by automatically mapping the directional movement to individual switches. It even has four built-in cursor speed settings.</p>
